STEP FORWARD

81007 INSOLE NATURA ECO

Insole made from recycled materials.

Manufactured using a new technology that combines polyurethane foam scraps, recycled rubber from shoe soles and a bio-based oil to create a high-density, open-cell polyurethane foam, ideal for use in insoles.

100% antistatic, electrical resistance < 1000 kΩ. Antibacterial treatment.

2D technology: combines two types of foam at the back of the insole, where the foot rests. Increases comfort, cushioning and stability, resulting in reduced fatigue.

Machine washable at 30°C

Abrasion resistance ≥ 25,600 dry cycles and 12,800 wet cycles.

Sizes: 35-48 EU / 2-13 UK
